**PATRICK WOOD, CPP, JOINS BUSINESS PROTECTION SPECIALISTS, INC.,
AS SENIOR SECURITY CONSULTANT**

RALEIGH, NC – Business Protection Specialists, Inc. (BPS), is proud to welcome Patrick Wood, CPP, as the newest addition to their expert security consulting staff. Patrick's duties as Senior Security Systems Designer will include assisting clients with evaluating, designing and implementing individualized security plans.

Patrick joins BPS with more than 25 years' experience as an electronic security technology professional providing design, project management and closeout services within the integrated electronic security industry. Most recently, Patrick served as both a senior security designer and the principal security consultant for two firms in the state of Washington. As a Certified Protection Professional, he regularly produces tailored electronic security system designs for clients, as well as engineered plan sets for both new and existing facilities.

"BPS is excited to have Patrick on board as a security consultant. His experience and wealth of knowledge in security design planning, implementation and coordination will enhance our company's capability to reach a variety of clients across multiple industries and continue delivering quality products in a timely manner," says BPS President and CEO Frank Pisciotta.

BPS is a professional, independent security consulting firm with no ties to system manufacturer or guard service companies. BPS partners with clients to provide practical, cost-effective security advice that fits the corporate culture of the client's organization. Quality services include a variety of security and threat assessments, regulatory compliance work, security program development and master planning, and security system design and implementation.

BPS conducts risk analysis, security plan and program development, manpower planning, emergency plans, and vulnerability assessments of specialized facilities (such as office headquarters, distribution centers, hospitals, colleges and universities, government buildings, water treatment and chemical plants).

BPS has a proven track record of delivering the highest level of client service. Consultants are Board Certified security professionals credentialed through International Association of Professional Security Consultants (IAPSC) and ASIS International. BPS security professionals are experienced, knowledgeable and capable of applying best practices to each client's organization.
